

RELAY[®] BRANCH

THORACIC STENT-GRAFT SYSTEM

The architecture
of precision

cardiva[®]

 **TERUMO**
Aortic

The architecture of precision

Flexible and stable from insertion to deployment

Designed with confidence so that each key step during your endovascular procedure with our RELAY®BRANCH device provides unparalleled precision

- **Partial expansion** allows for predictable and precise deployment
- Designed to **respect** the entire thoracic anatomy
- Performance zones offer you **optimal sealing and fixation** by providing a **precise radial load**
- **Intuitive sequential deployment** allows for the controlled release of the stent's potential energy in phases, providing predictability and accuracy
